Geological boundary
Fault
Western boundary of sequence dominated by feldspar–porphyry lava
POST–CAMBRIAN ROCKS
Post–Devonian rocks
Devonian granites
Silurian–Devonian Eldon Group
Ordovician limestone
Late Cambrian–Early Ordovician Owen Conglomerate and correlates
Middle to Late Cambrian Dundas Group and correlates
Unfossiliferous probable Cambrian sequences
Early–Middle Cambrian? Crimson Creek Formation
Early Cambrian quartzite–mudstone–dolomite sequences (Success Creek and RoseberyGroups)
PROTEROZOIC ROCKS
Relatively unmetamorphosed (mainly Oonah Formation) with dolomite and volcanics in upper part (stippled)
Metamorphosed sequences of Cradle Mt.–Frenchmans Cap area, Arthur Lineament Sorell Peninsula and Concert Hill
CAMBRIAN VOLCANIC AND IGNEOUS ROCKS
Mt.Read Volcanics–some sedimentary intercalations shown(dashed lines) and upper sequence of Tyndall Group and correlates (solid triangles)
Cambrian granites
Mafic volcanics
Gabbroic Rocks
Ultramafic–mafic complexes
