5 cm

280mm

QUATERNARY

- Qb Beach sands
- Qs Blown sand and swamp

SILURO-DEVONIAN

- Sm Mathinna Beds -hornfels (bedding intact)
- Sm Mathinna Beds -hornfels (bedding streaked out or absent)

DEVONIAN

- Leucocratic dyke rocks
- Dpmg Porphyritic microgranite
- +Dpb+ Porphyritic biotite granite/adamellite
- xDmbx Biotite-muscovite granite
- vDbg Biotite-granodiorite
- +Dbh+ Biotite-hornblende granodiorite
- Transitional rock

- Fault
- Geological contact
- 60 Bedding : strike and dip
- Bedding : dip > 80°
- Bedding : vertical
- 80 Cleavage : strike and dip
- Foliation : steep dip
- Foliation : vertical
- 70 Joint : strike and dip
- Fracture showing direction of movement

# DETAILED GEOLOGY ROCKY HEADLAND BETWEEN BOOBYALLA AND TOMAHAWK

Geology by D.I.GROVES and D.J.JENNINGS

Drawn by T.R.Bellis

November 1970
