

BEDROCK SKETCH MAP CENTRAL AND SOUTHERN BLUE TIER BATHOLITH

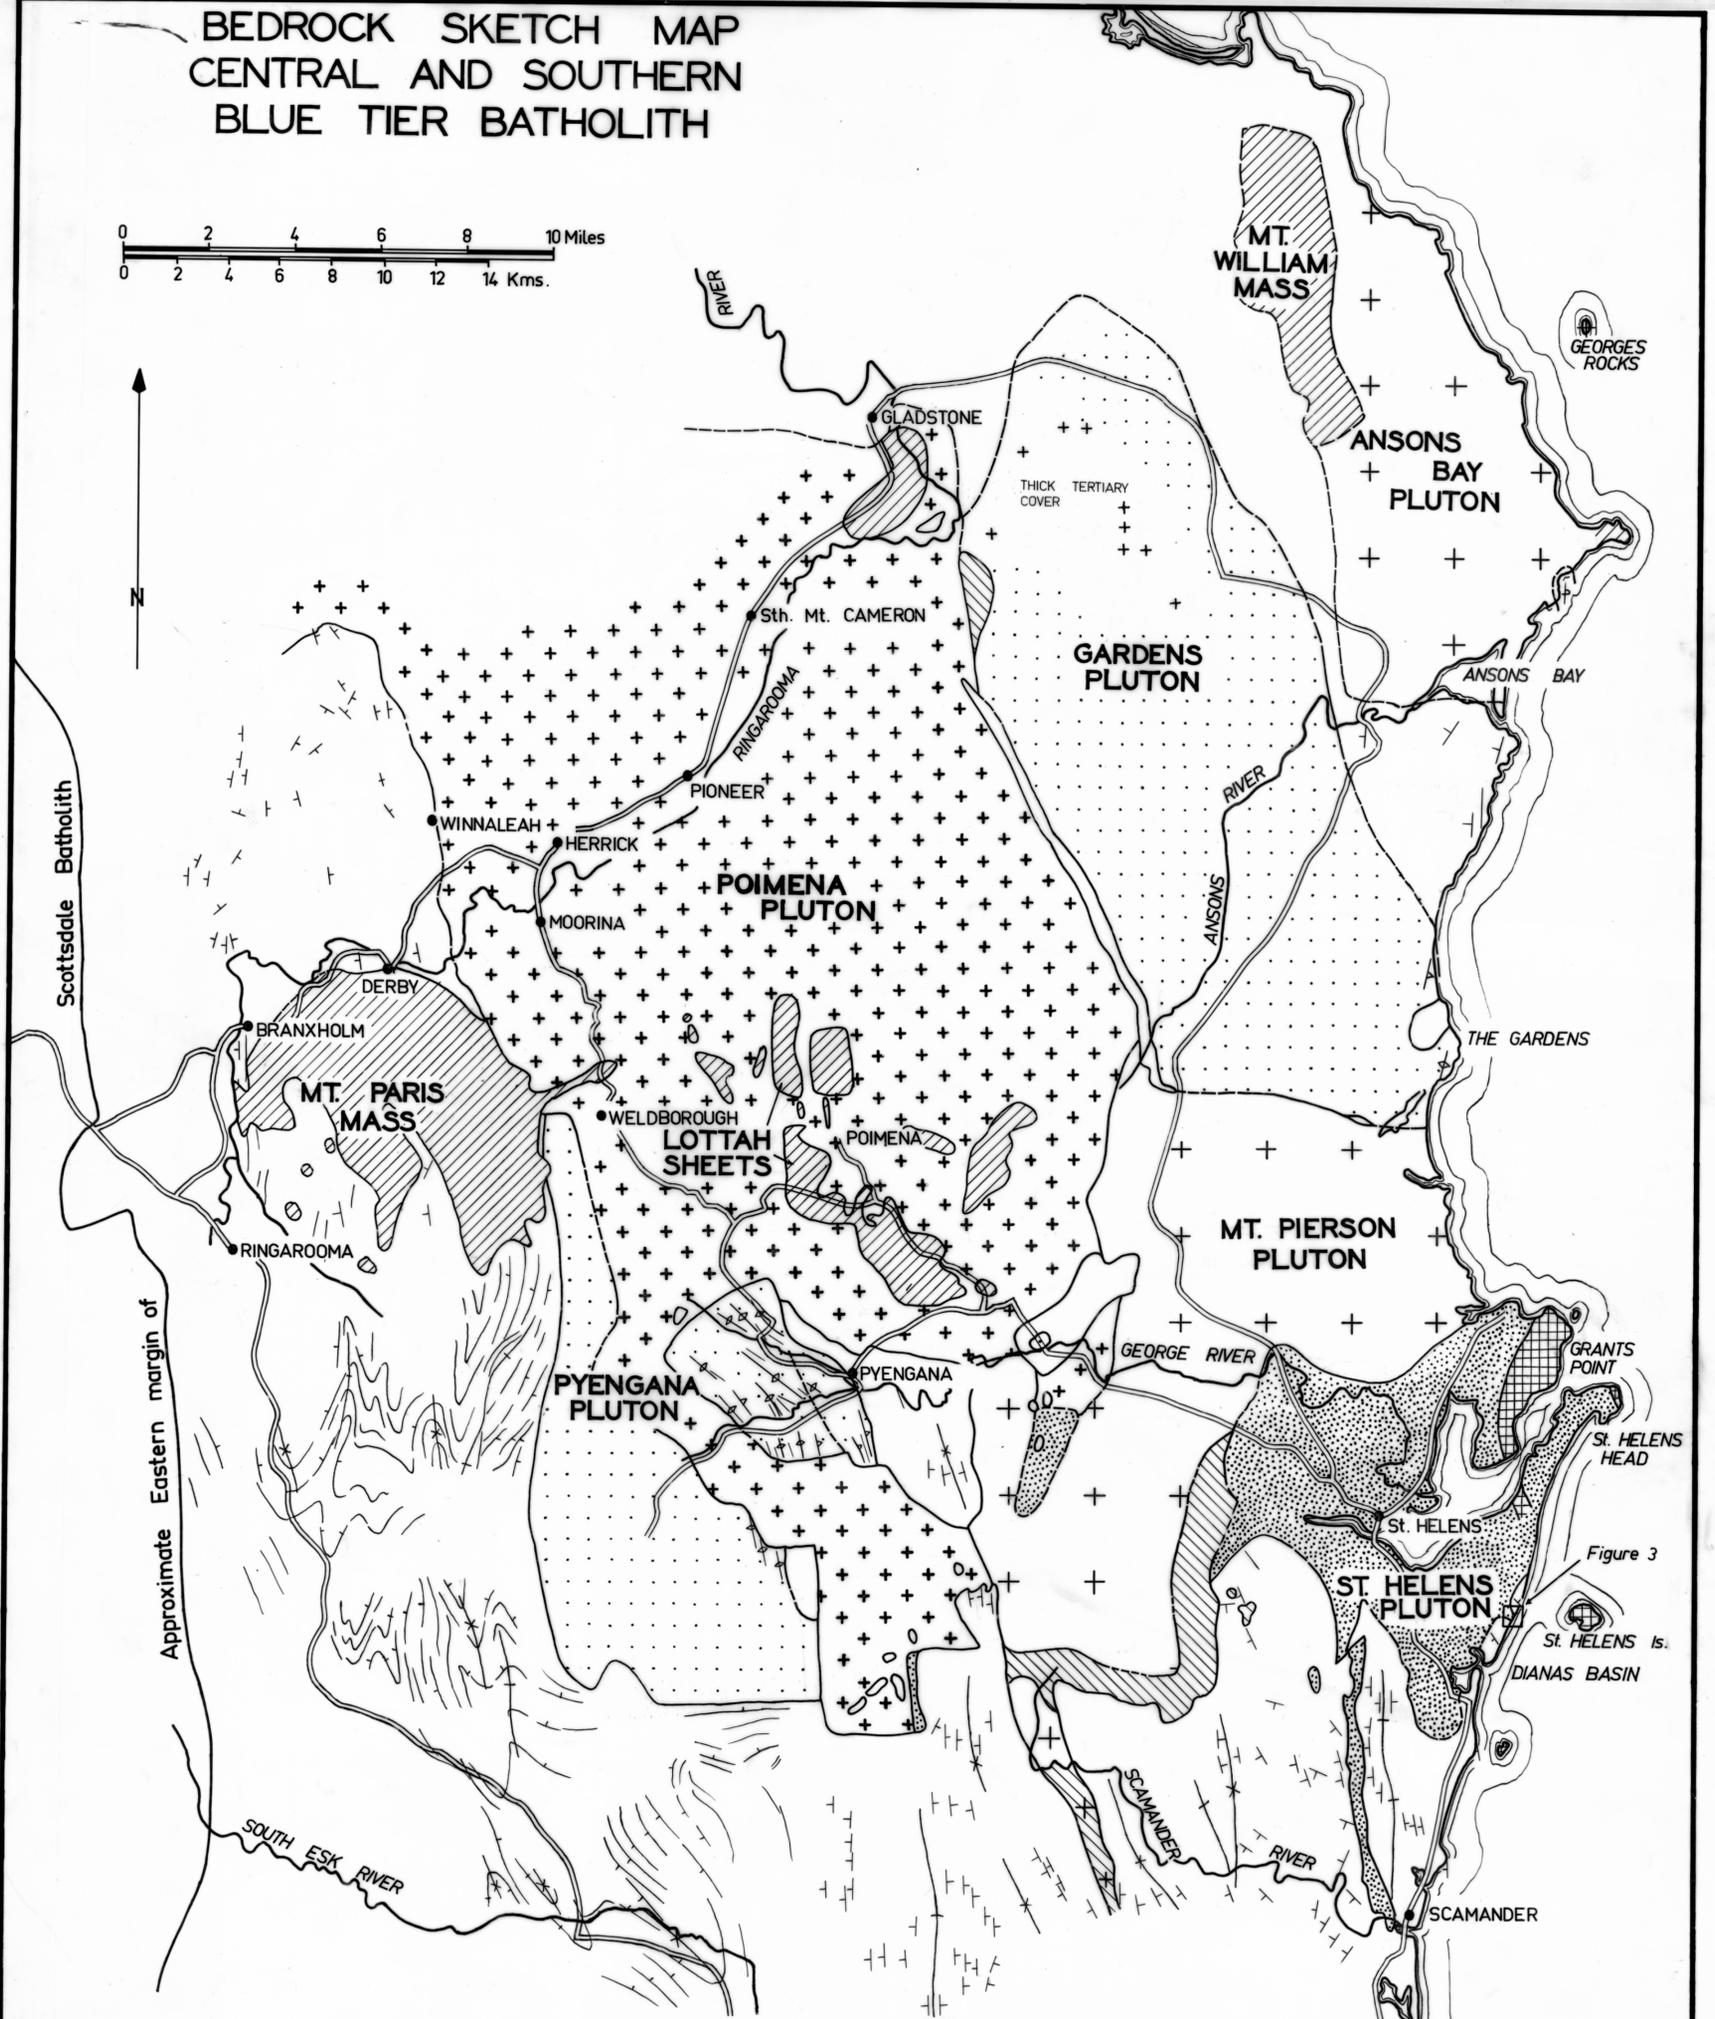

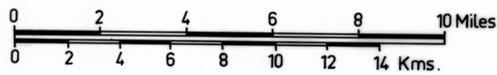

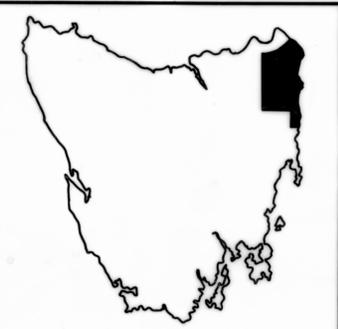

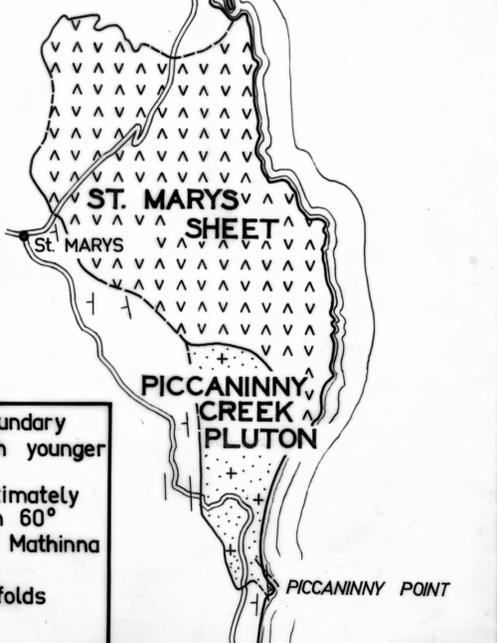

Figure 3

- Fine to medium grained biotite adamellite and granite, and muscovite granite
- Biotite granodiorite, biotite hornblende granodiorite and adamellite, diorite, monzonite and syenite
- Fine to medium grained biotite muscovite adamellite and granite
- Porphyritic biotite granite/adamellite (fine to medium grained groundmass)
- Biotite muscovite microgranite and granite
- Coarse grained biotite granite and adamellite, and porphyritic biotite adamellite (coarse grained)
- Biotite hornblende granodiorite, hornblende biotite granodiorite and biotite granodiorite
- Biotite hornblende adamellite and biotite hornblende granodiorite
- Biotite hypersthene adamellite porphyry
- Mathinna Beds (sandstones, siltstones and shales)

LOCALITY MAP

- Established geological boundary
- Inferred boundary beneath younger rocks
- Secondary foliation approximately vertical, dips steeper than 60°
- Generalised strike lines in Mathinna Beds, with dips indicated
- Crestal traces of some folds

Geology by D.I.GROVES with contributions from J.D. Cocker, D.J. Jennings, M.J. Longman, R.D. McNeil, V. Patel, V.M. Threader, D.R. Walker

Draughtsman: T.R. BELLIS
