

R710-MAGNET TAILING DAM

Cross-section through Magnet Tailing Dam showing:

Zone A - very dark weathered top (5 cm)

Zone B - brownish stained, not as weathered as 'A' down to 50 cm

Zone C - below 50 cm no brown staining which indicates weathering

▣▣▣▣ - bands of coarse stones relatively free of fine material.

These bands were spaced through the normal tailings which were much finer in size.
