GEOLOGICAL SYMBOLS

- strike and dip direction of bedding plane
- dominant cleavage strike and dip direction
- dominant strike direction of bedding planes
- probable trend and plunge of hingeline of synform and antiform
- observed fault with relative displacement as shown
- observed geological boundary
- specimen field numbers
MW74, ME63

DYKES LESS THAN 10m WIDE

- fine to medium grained and cleaved
- fine to medium grained and cleaved and containing asbestos-form mineral
- undifferentiated

DYKES GREATER THAN 10m WIDE

- leucocratic medium to coarse grained with mafic segregations and sometimes an asbestos-form mineral (dotted over print)

GEOLOGY

- unspecified geology (EoC to recent)
- Irby Siltstone
- Detention Sub-group
- Cowrie Siltstone
