

COAL EXPLORATION AREA EXEMPT FROM THE MINING ACT 1929

SCALE 1:20 000

OCTOBER 1980

C. R. CALVER & R. H. CASTLEDEN
6592 000M N

DRILLING COMPLETED D.O.M.	●
H.E.C.	○
PROPOSED ACCESS	—
MAIN ROAD	—
VEH. TRACK	—

	Swamp, marsh deposits
	River gravels, alluvium
	Talus, composed dominantly of dolerite
	Talus, composed dominantly of sandstone, minor dolerite
	Dolerite blockfields, in situ, nature of dolerite uncertain
— Erosional surface	
	Fine-grained dolerite dykes (width exaggerated, strike approx.)
	Granophyre (top of dolerite sill)
	Dolerite
— Intrusive boundary	
	Dominatedly lithic sandstone } Upper Parmeener Super-group
- - - Geological boundary - position approximate	
	Fault - position approx., downthrow side indicated
	? Inferred fault
	⤴ Slope failure (rockfall, landslide)
