DEPARTMENT OF MINES TASMANIA

WEST COAST AREA TASMANIA

FLIGHT PATH PLOT

SCALE 1:50000

0 1000 2000 3000 4000 5000 METRES

SURVEY LOCATION

SHEET INDEX

Navigation control was by reference to photostations and/or photo strips. Flight path analysis was achieved by identification of 10m ground tracking photographs on the navigation control. The ground tracking camera was operated at a rate of one camera frame for two data samples, such that successive camera frames overlap. An attempt was made to recover fiducials at intervals of 1.0 kilometre, and only recovered fiducials are shown on the map. During processing the photostation was controlled using the Australian Metric Grid control points.

SURVEY BOUNDARY
 Registration point identified on photostation.
 5000 metre Australian Metric Grid.

PROJECT NUMBER 81544 SURVEYED MAY 1981
