

a Sandstone	g Black Shale	o Porphyry and Basic Dyke	Unformed Roads	Inclined Dip and Strike	Old dunes
b Limestone	h Slate	p Tillite	Geological boundary observed	Scout bore for mineral beach sands	Lagoon stream
c Laterite or Ironstone	a Breccia	q Quartzite	Geological boundary inferred	Submarine bar	Intermittent stream
v Volcanics	i Actinolite Hornfels	r Mica Schists and muscovite sillimanite schists	Fault observed	Sand beach shore reef	Swamp
d Altered Volcanics	j Biotite Actinolite Hornfels	s Siltstone	Fault inferred	Sand cliff	Slope in bedrock
e Agglomerate and Tuffs	k Biotite Hornfels	t Aplite	Anticlinal axis	Vegetated sand cliff	Conical dunes
f Shale	l Pyroxene Hornfels	u Granite	Synclinal axis	New stranded shorelines	Direction of younging
f Spotted Shale	m Pyroxene Garnet Hornfels	v Sand dune development boundary	Horizontal Dip and Strike	New dunes	Sandhills
f Grey mudstone	n Quartz	w Formed Roads	Vertical " " "	Old stranded shorelines	Drains

Convergence and declination approx only
