Wurawina
Supergroup

Quartzose conglomerate,
turbiditic quartzose sandstone, siltstone, mudstone

Mainly quartzarenite and haematitic siltstone

Labile sandstone, chert, mudstone and basaltic rocks (A) with small ultramafic bodies (B)
Large ultramafic bodies

C, D - strongly deformed conglomeratic sequences

E - mainly dolomite

F, G - quartzarenite, pelite and dolomite. G is less metamorphosed
