

- amph Amphibolite
- dol Dolomite (siliceous)
- cht Chert
- sh Shales, mudstone
- qtzt Quartzite

- Contour greater than 10ppm arsenic in auger soil sampling along grid lines
- ▨ Genie EM anomaly
- 45° Bedding dip and strike
- LC001 0.71 Huminex water sample locality with sample number above and ppb gold below
- \* 620 Rock sample
- 0.11 Huminex soil traverse with sample points and gold values above detection level of 0.04ppb
