

*Sketch Plan showing possible Deviation of Blythis Ck  
 In Connection with Report to the Directors of  
 THE TASMANIA G.M. & Q.C. COY*

*Note - The figures in blue denote the heights of the different points relative to the lowest point of Saddle between Blythis Ck & Sassaparilla Ck which is assumed at 100 ft. The surface at Jeffrey Shaft is 159 ft*

*Geoff Cooze  
 25 April 1890*
