

Derby 15th October 1907

Report on re survey of 94 ac 5303 Briseis
Tin Mines Limited M.L.

In making this survey I was able to find
sufficient old marks to re-establish boundaries
but the original course of river as traversed
by the Surveyor in 1881 is now all
under water through influence of tailings
filling up original bed of river raising
level of water and spreading it over
a great width. The original course of
river in vicinity of bend near old sta
34 is now entirely filled up with tailings
and there is no running water there,
the river having changed its course.
I made a traverse along present edge of
water (which however is constantly changing)
and from this traverse computed the position
of original traverse and its intersections with
the old marked boundaries.
Using the computed position of original
traverse and original offsets from same
to banks I then computed the area to
be 94 acres which is only 2 ac more
than by original survey.

Yours obediently
Donald Fraser
