FOREST DIVISION TOPOGRAPHICAL MAP

SOUTH SHEET

Scale: 2 Miles to an Inch

Scale of Miles

VI. 100r. (Approx.)

Compiled by authority of S.W. Sloan, B.A.,
Conservator of Forests.Compilation and preparation supervised by
Lieut. Col. D.A. Lane, v.o. Working Plans Officer,
Draughtsman, A.R. Love,
December 20th 1938.

NOTE.

This map is based on Sprent's triangulation and is compiled from Forest Surveys Air Photographs and Road Reports.
Private property boundaries are compiled from County Charts.

The principal intention of this map is to show the main topographical features and general configuration of the country and a great amount of detail is omitted. Those portions which have been compiled from forest surveys are more accurate, the remainder being sketched in from road reports.

Contours are approximate but for convenience have been drawn in solid lines.
Classification of roads is incomplete and the positions of many are merely sketched in.

Although sufficiently correct for the purposes for which it was prepared this map should not be regarded as entirely accurate.

CONVENTIONAL SIGNS

ROADS	TRAMWAYS
First Class	In use
Second Class	Old Formations
Third Class	Post Office
Tramways	Church
BOUNDARIES	State School
Private Property	Gate across road
State Forest	Beaches
	Sand Dunes
