

- GEOLOGICAL SECTIONS -
KING ISLAND SCHEELITE MINE
NO. 7-10 LINES

FOR POSITION OF SECTION LINES IN PLAN SEE PLATE 3.

- Reference -

- | | |
|---|---|
| Detritus | Muscovite hornfels |
| Sand, gravel, alluvium, etc. | $WO_3 > 0.3\%$ } Definite in drillholes & in adits,
inferred elsewhere |
| Granite, porphyry, aplite | $WO_3 < 0.3\%$ or unknown |
| Biotite-actinolite-hornfels, biotite-hornfels | Quartz-scheelite vein |
| Actinolite-hornfels (massive hangingwall type) | Geological boundary - definite |
| Pyroxene-garnet-hornfels (hangingwall type) | " - inferred |
| Chiefly garnet-hornfels, garnet-pyroxene-hornfels, pyroxene-hornfels (constituting the ore zones) | Fault - definite |
| Spotted calcite-hornfels, pyroxene-hornfels & biotite-quartzite (marker beds) | " - inferred |
| Biotite-quartzite | Drillhole - inclined |
| Calcite-hornfels | " - vertical |
| Thin bedded actinolite-hornfels & biotite-actinolite-hornfels (footwall rocks) | Adit, cross-cut |
| ditto with bands of garnet-pyroxene-hornfels, etc. | 120' 120' Bench |

NO. 7 LINE. BEARING $10^\circ E$

NO. 8 LINE. BEARING $10^\circ E$

NO. 9 LINE. BEARING $10^\circ E$

NO. 10 LINE. BEARING 0°
