MEMORANDUMTRIP FROM HOBART TO TRIABUNNA AND RETURNTuesday, 22nd October, 1957

Left Hobart 8 a.m. and arrived Triabunna 10 a.m. Went out to Bore No. 20 near beach on J. Ferguson's property. Drill being rigged on boring site.

Checked over items on the Glasgow Engineering A/c for repairs on G33. Everything was OK and the driller satisfied with the manner in which the plant was performing.

J. Blake also claimed the extra fitting of shaft, chassis repairs, strengthening of spudding arm etc. included in extras were necessary and satisfactorily carried out.

I recommend that J. Blake be paid at least the same weekly wage that was set down for L. Fletcher when operating plant in Triabunna district.

Arrived at Hobart 6 p.m.

(K.L. Evans)

DRILLING SUPERINTENDENT

The Director of Mines,
Department of Mines,
HOBART.
