

Table 2 Drilling log from the uppermost bore drilled on the Payne property

King Island Drilling - Salinity Investigation	
Geological log – Site: Payne Upper	
Depth (m)	Description of strata
0 – 2	Dark silty clay
2 – 4.8	Red and grey weathered granite, friable and oxidised
4.8 – 6.3	Possible dyke, grey, and very fine grained and oxidised with a 'soapy' feel
6.3 - 9.2	Fine grained granite
9.2 – 12.3	Partially weathered and fractured fine grained grey granite
12.3 – 14.3	Fine grained grey granite
Notes:	Oxidised to about 6 metres Lack of saprolite (decayed rock mass)
