Ocean Bounty Wellsite Manager
Ocean Bounty Wellsite Geologist

Our Reference: VT3:RWQ:210/RIG.T12

Your Reference:

Date: 28th August 2001

Subject: Thylacine -2 Final Coordinates

With reference to the above subject, I **confirm** the **final** coordinates of the drill stem of the drilling rig Ocean Bounty over the Thylacine - 2 well location is as follows:

Latitude	:	39° 13' 42.675" South
Longitude	:	142° 50' 55.000" East
Easting		659 564.5 metres
Northing		5 656 220.4 metres

The above coordinates are based on the Australian Geodetic Datum 1984 (AGD 84) and the Australian Map Grid (AMG) Zone 54, Central Meridian 141° East.

This position is 1.7 metres on a bearing of 247° (T) **from** the intended location.

Note: The coordinate relates to the drill stem location based on a surface positioning system. The seabed location may vary due to the effect of currents over the water depth. With no sub-sea positioning system in use the seabed location can only be estimated to be within +/- 3 metres of the drill stem location

R W. Quarrill
Senior Surveyor
Geomatics Department
