## Comments

Production down today due to a circle on line VCUE08-N04 due to an airleak on source string 2. Lines completed were VCUE08-N05 & N09, line N04 up to midnight. Line N04 also lost raw navigation data from SP 2918-2889 when SPM2 failed the line was continued using SPM1 which does not output raw data, when the spare SPM2 was initialised there was no jump in the navigation position.
