

Five basalt types in polymict conglomerate

Polymict conglomerate – Plag-phyric
basalt within glassy vesicular basalt

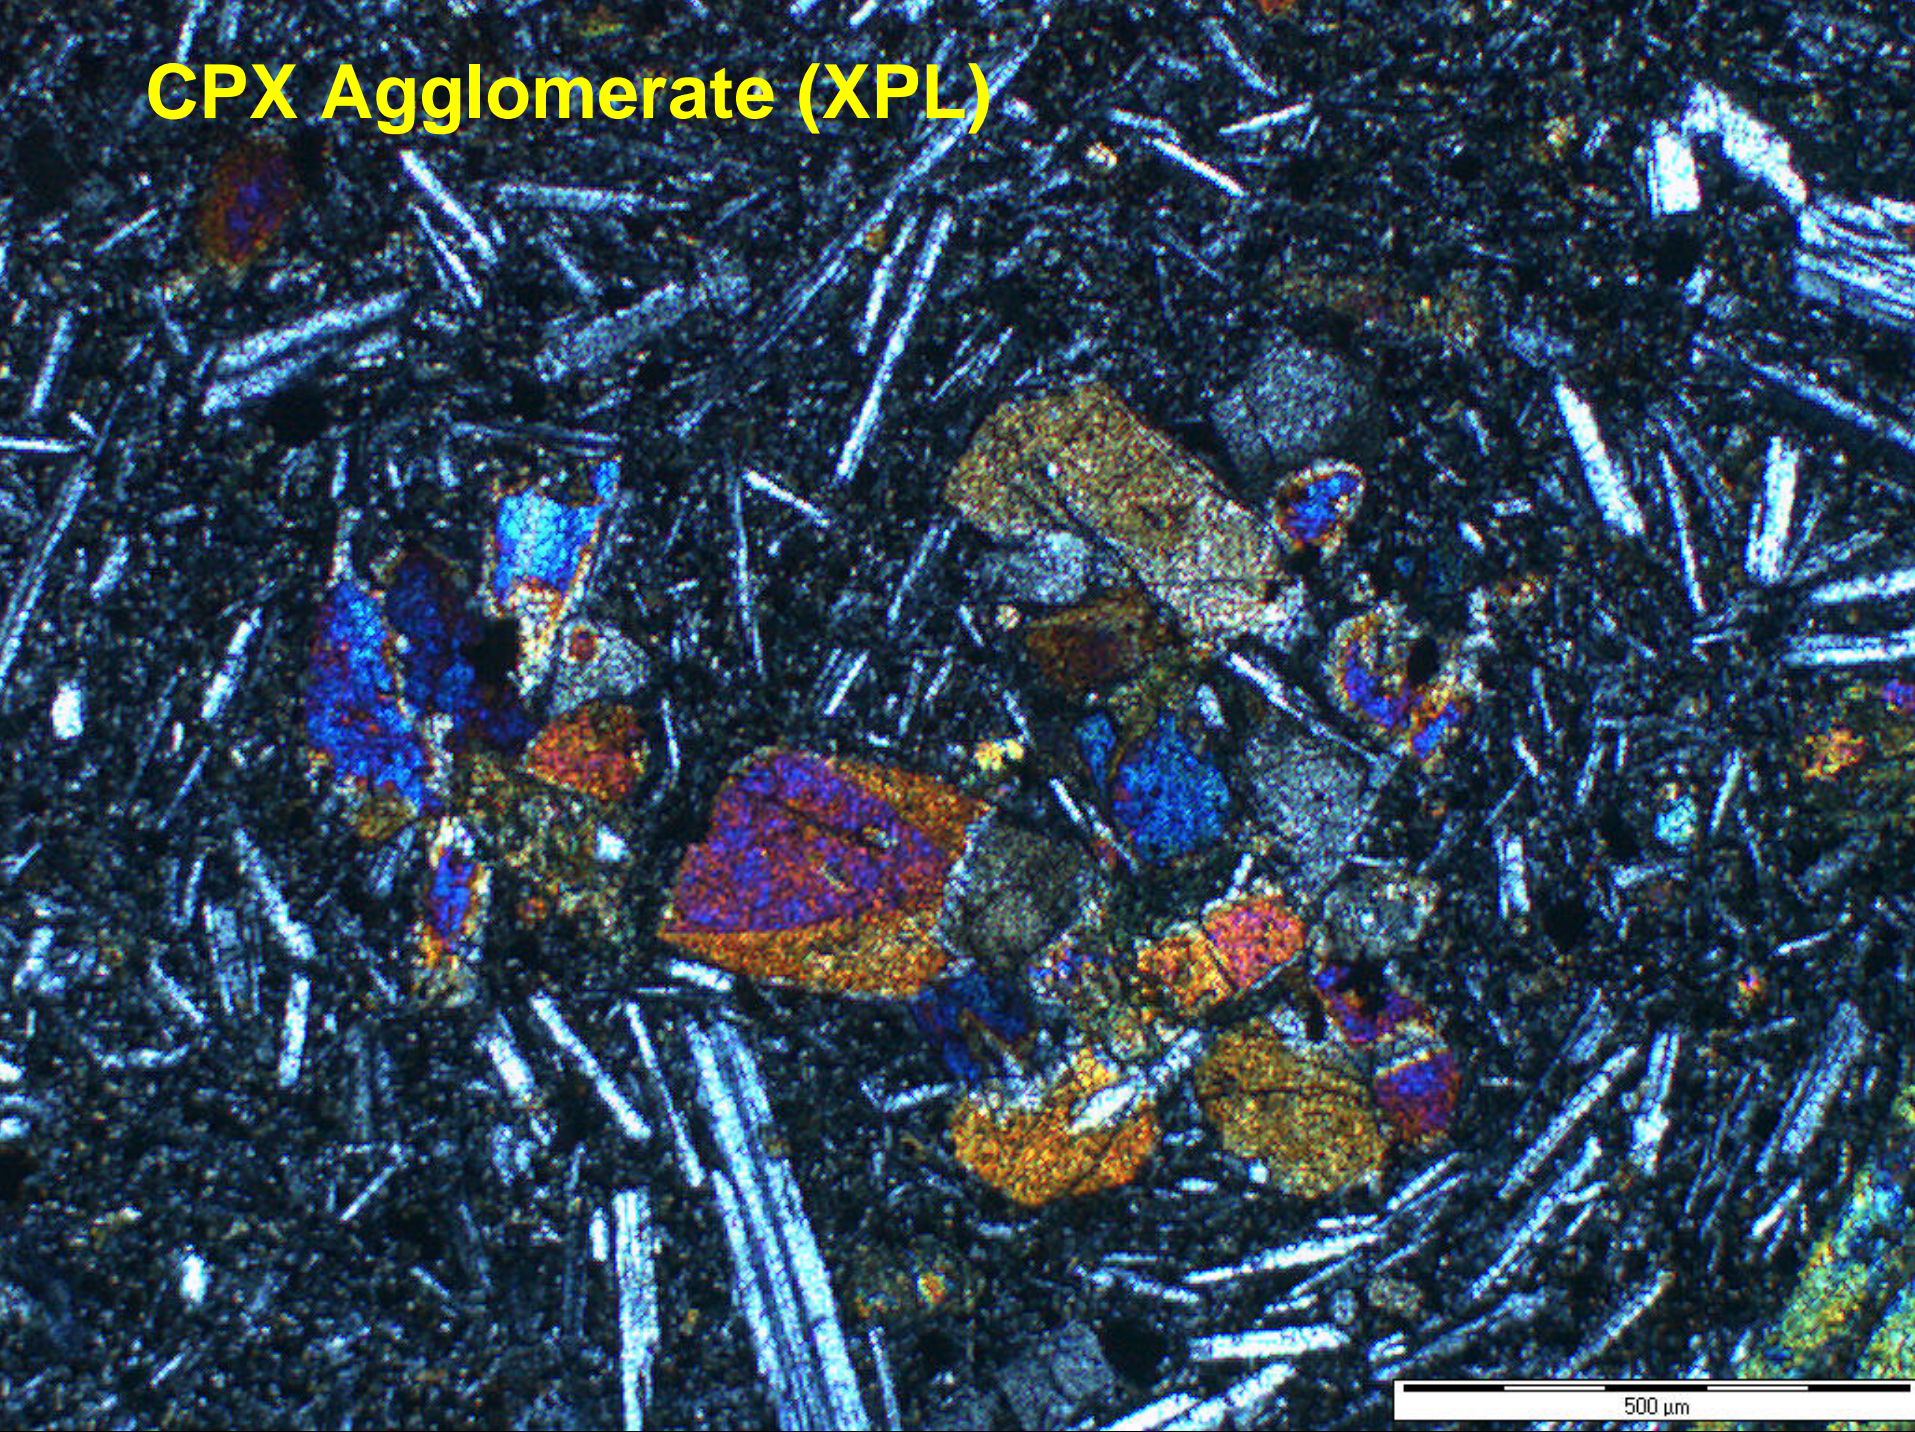

CPX Agglomerate (PPL)

2000 μm

CPX Agglomerate (XPL)

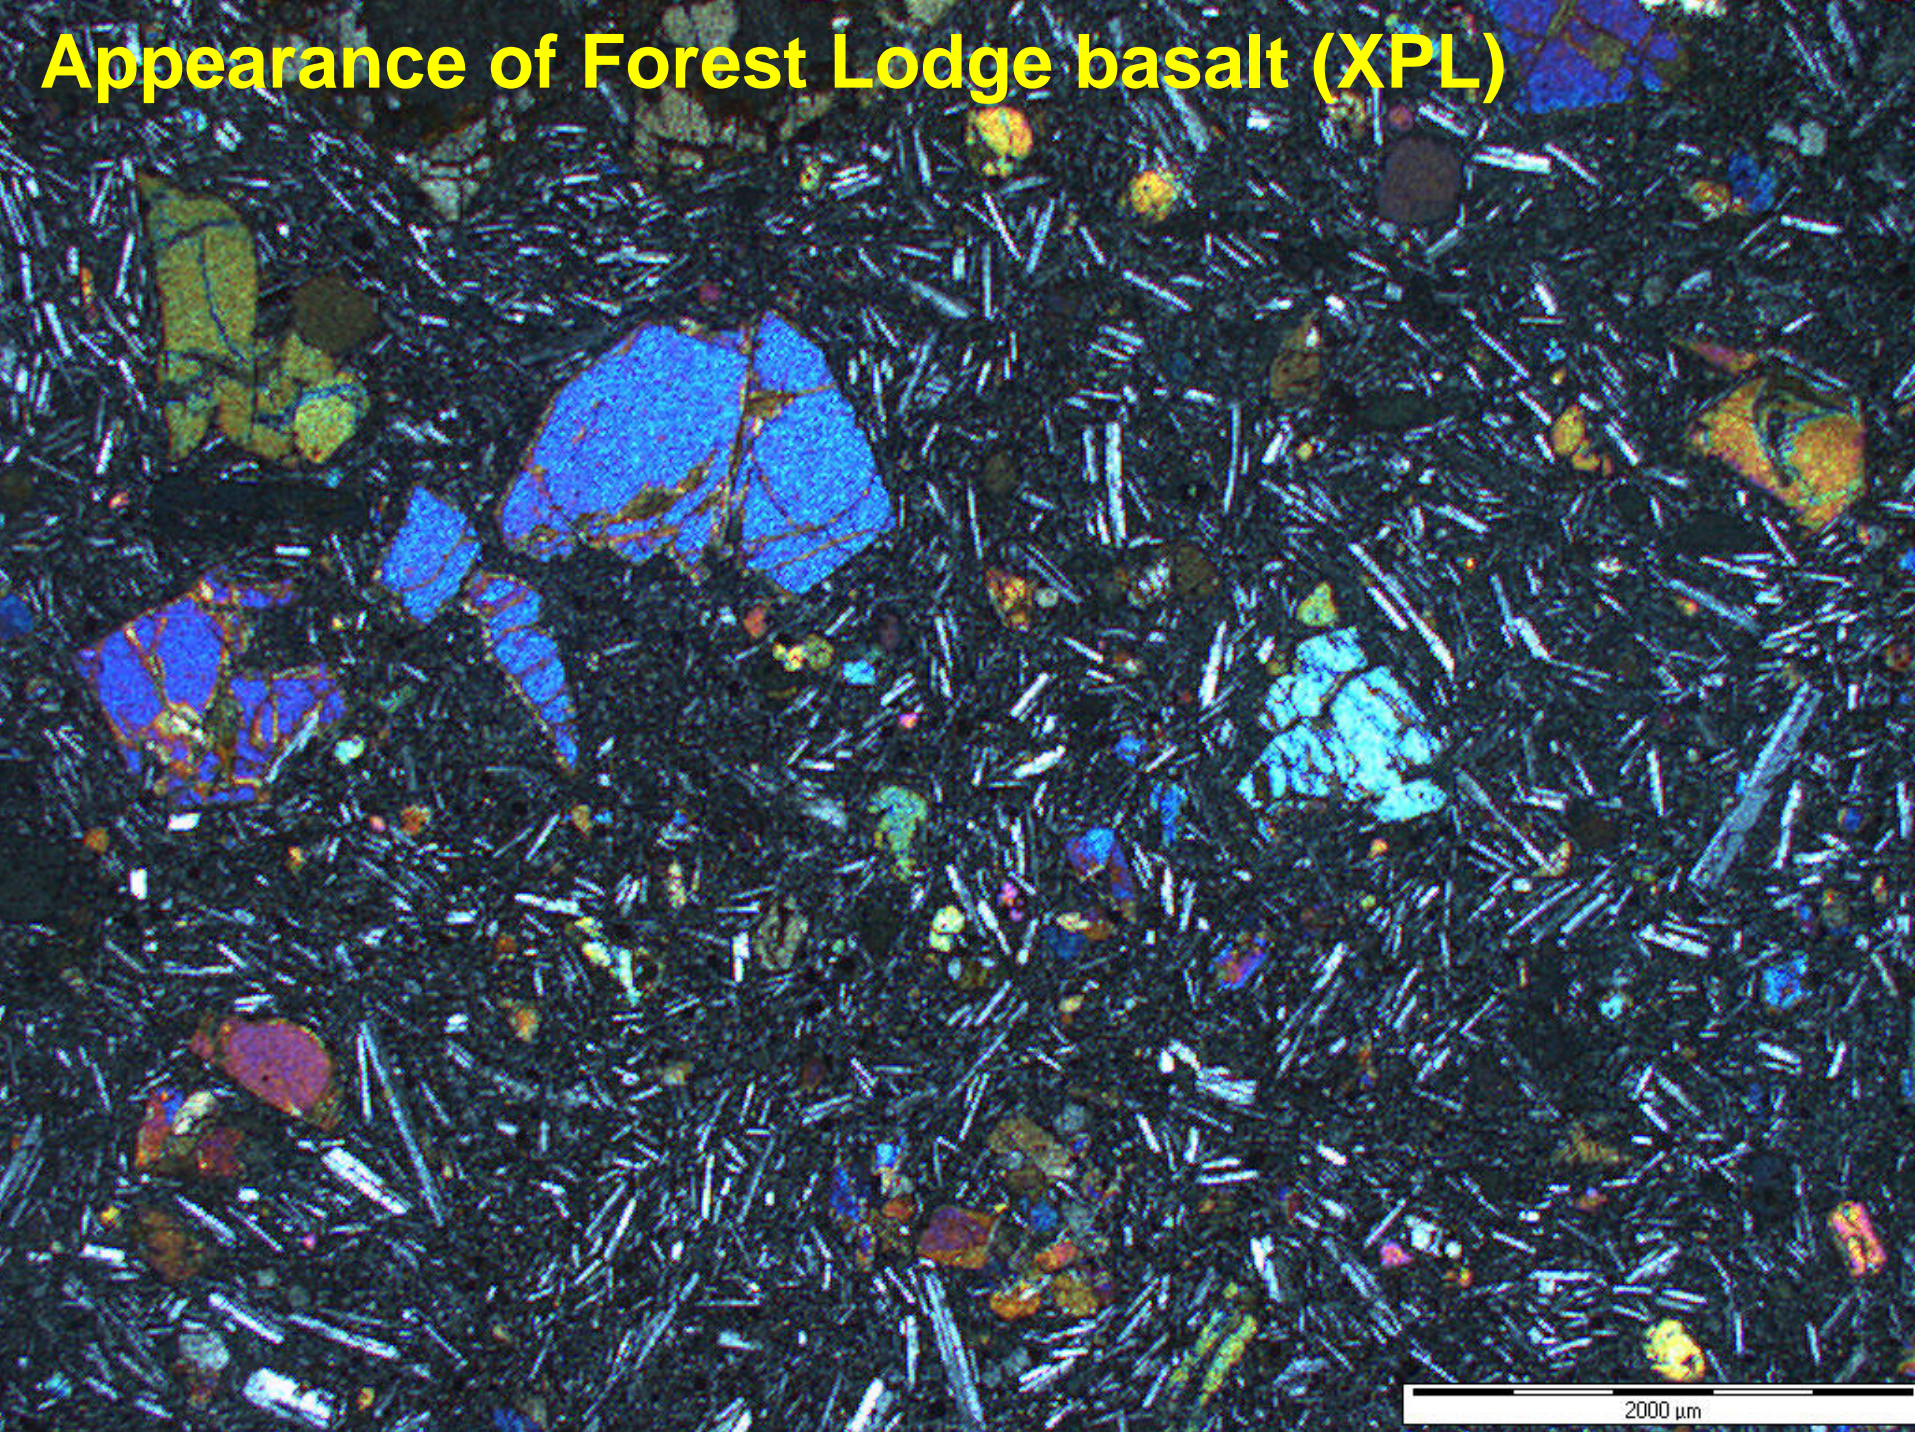

500 μm

Appearance of Forest Lodge basalt (PPL)

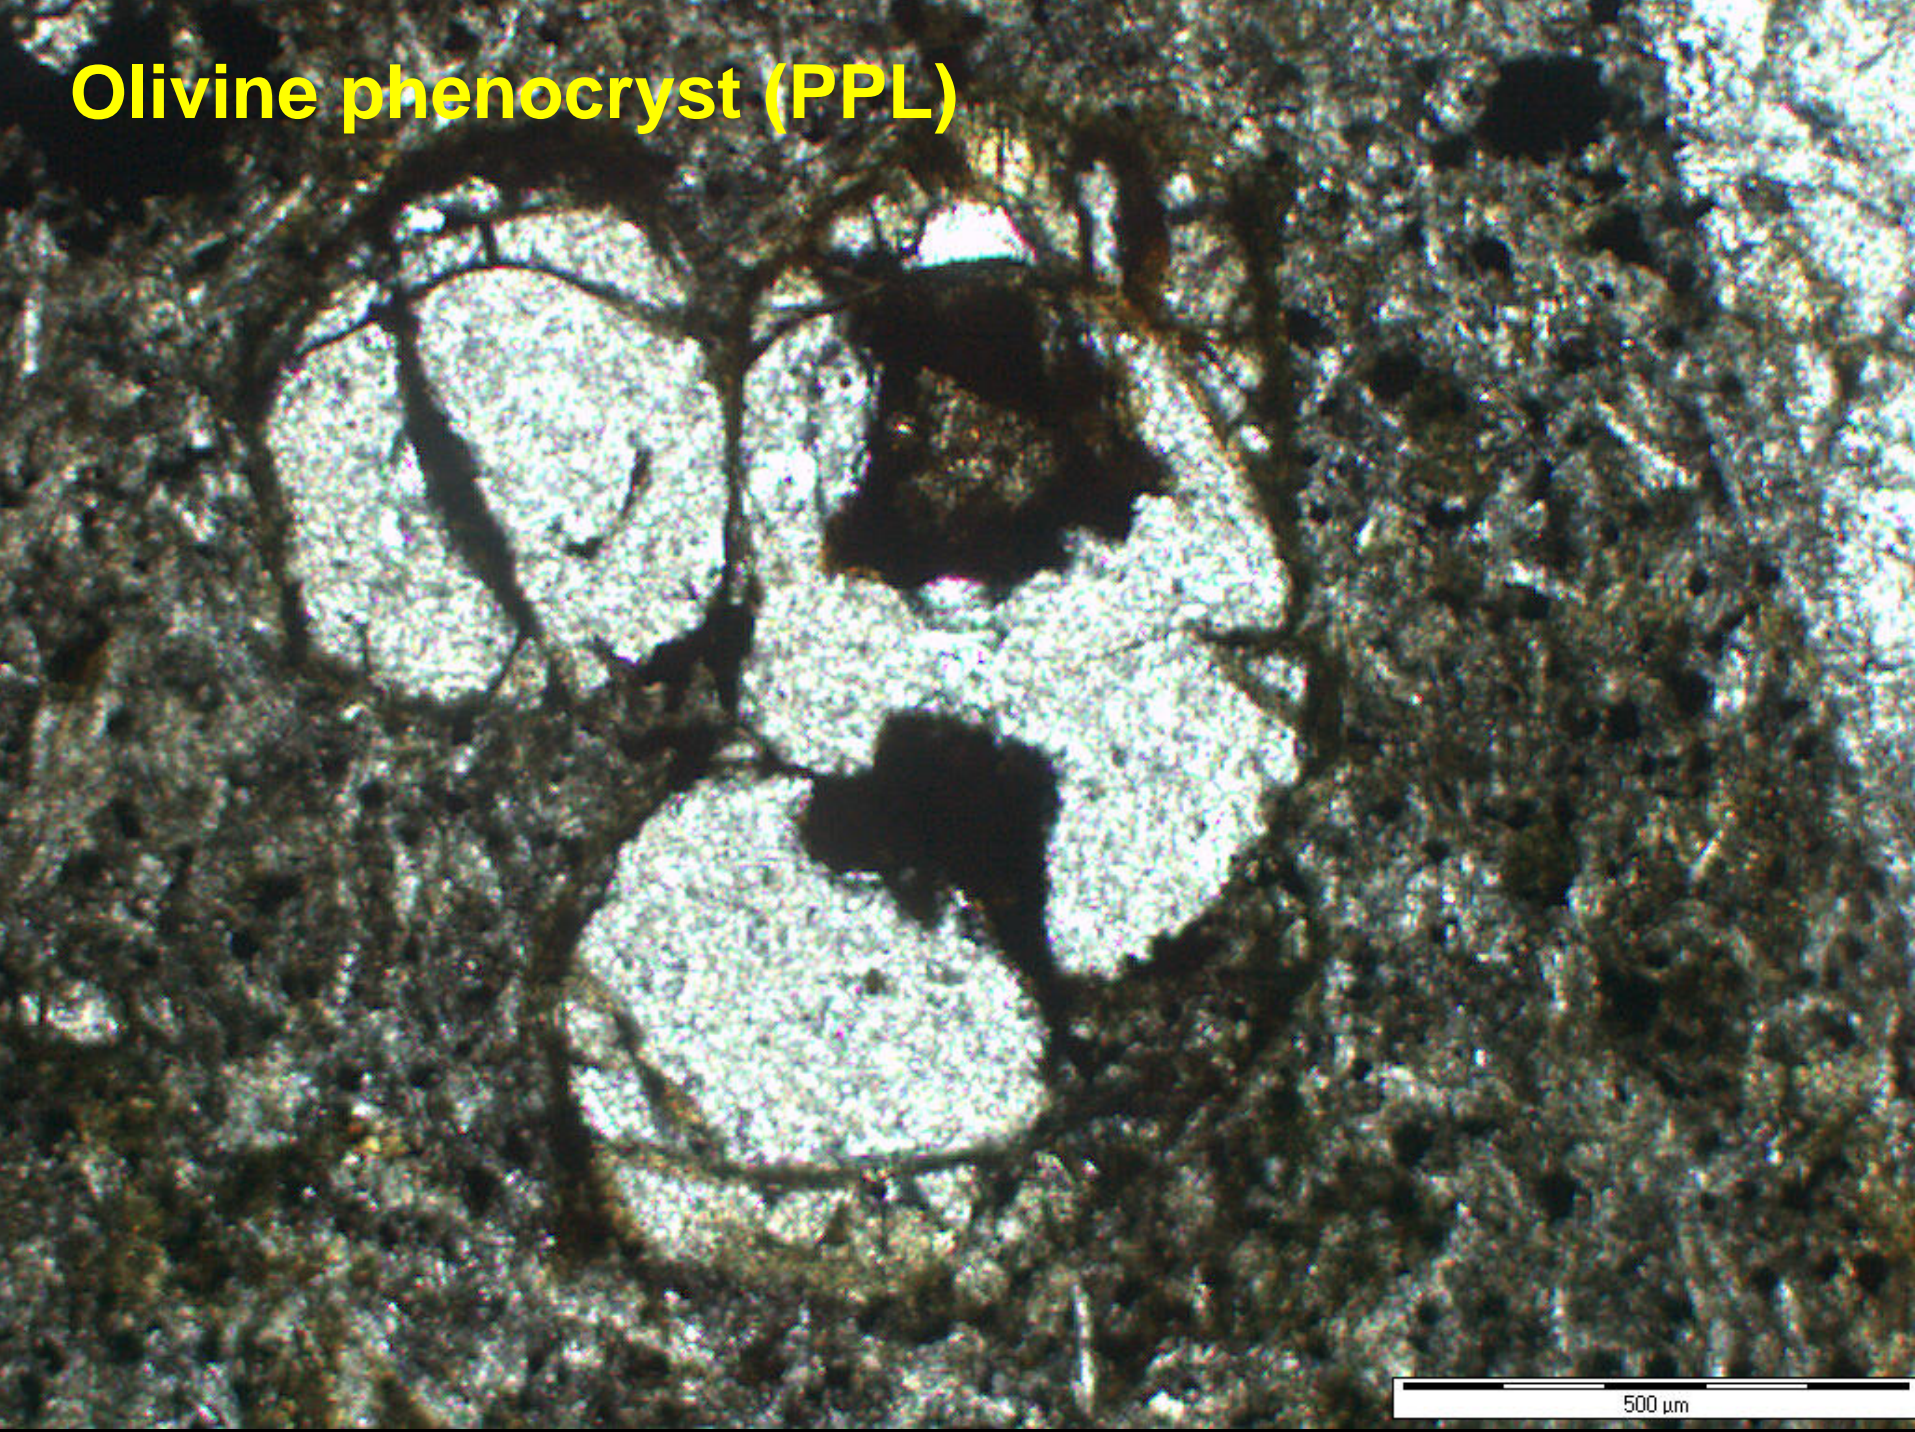

2000 μm

Appearance of Forest Lodge basalt (XPL)

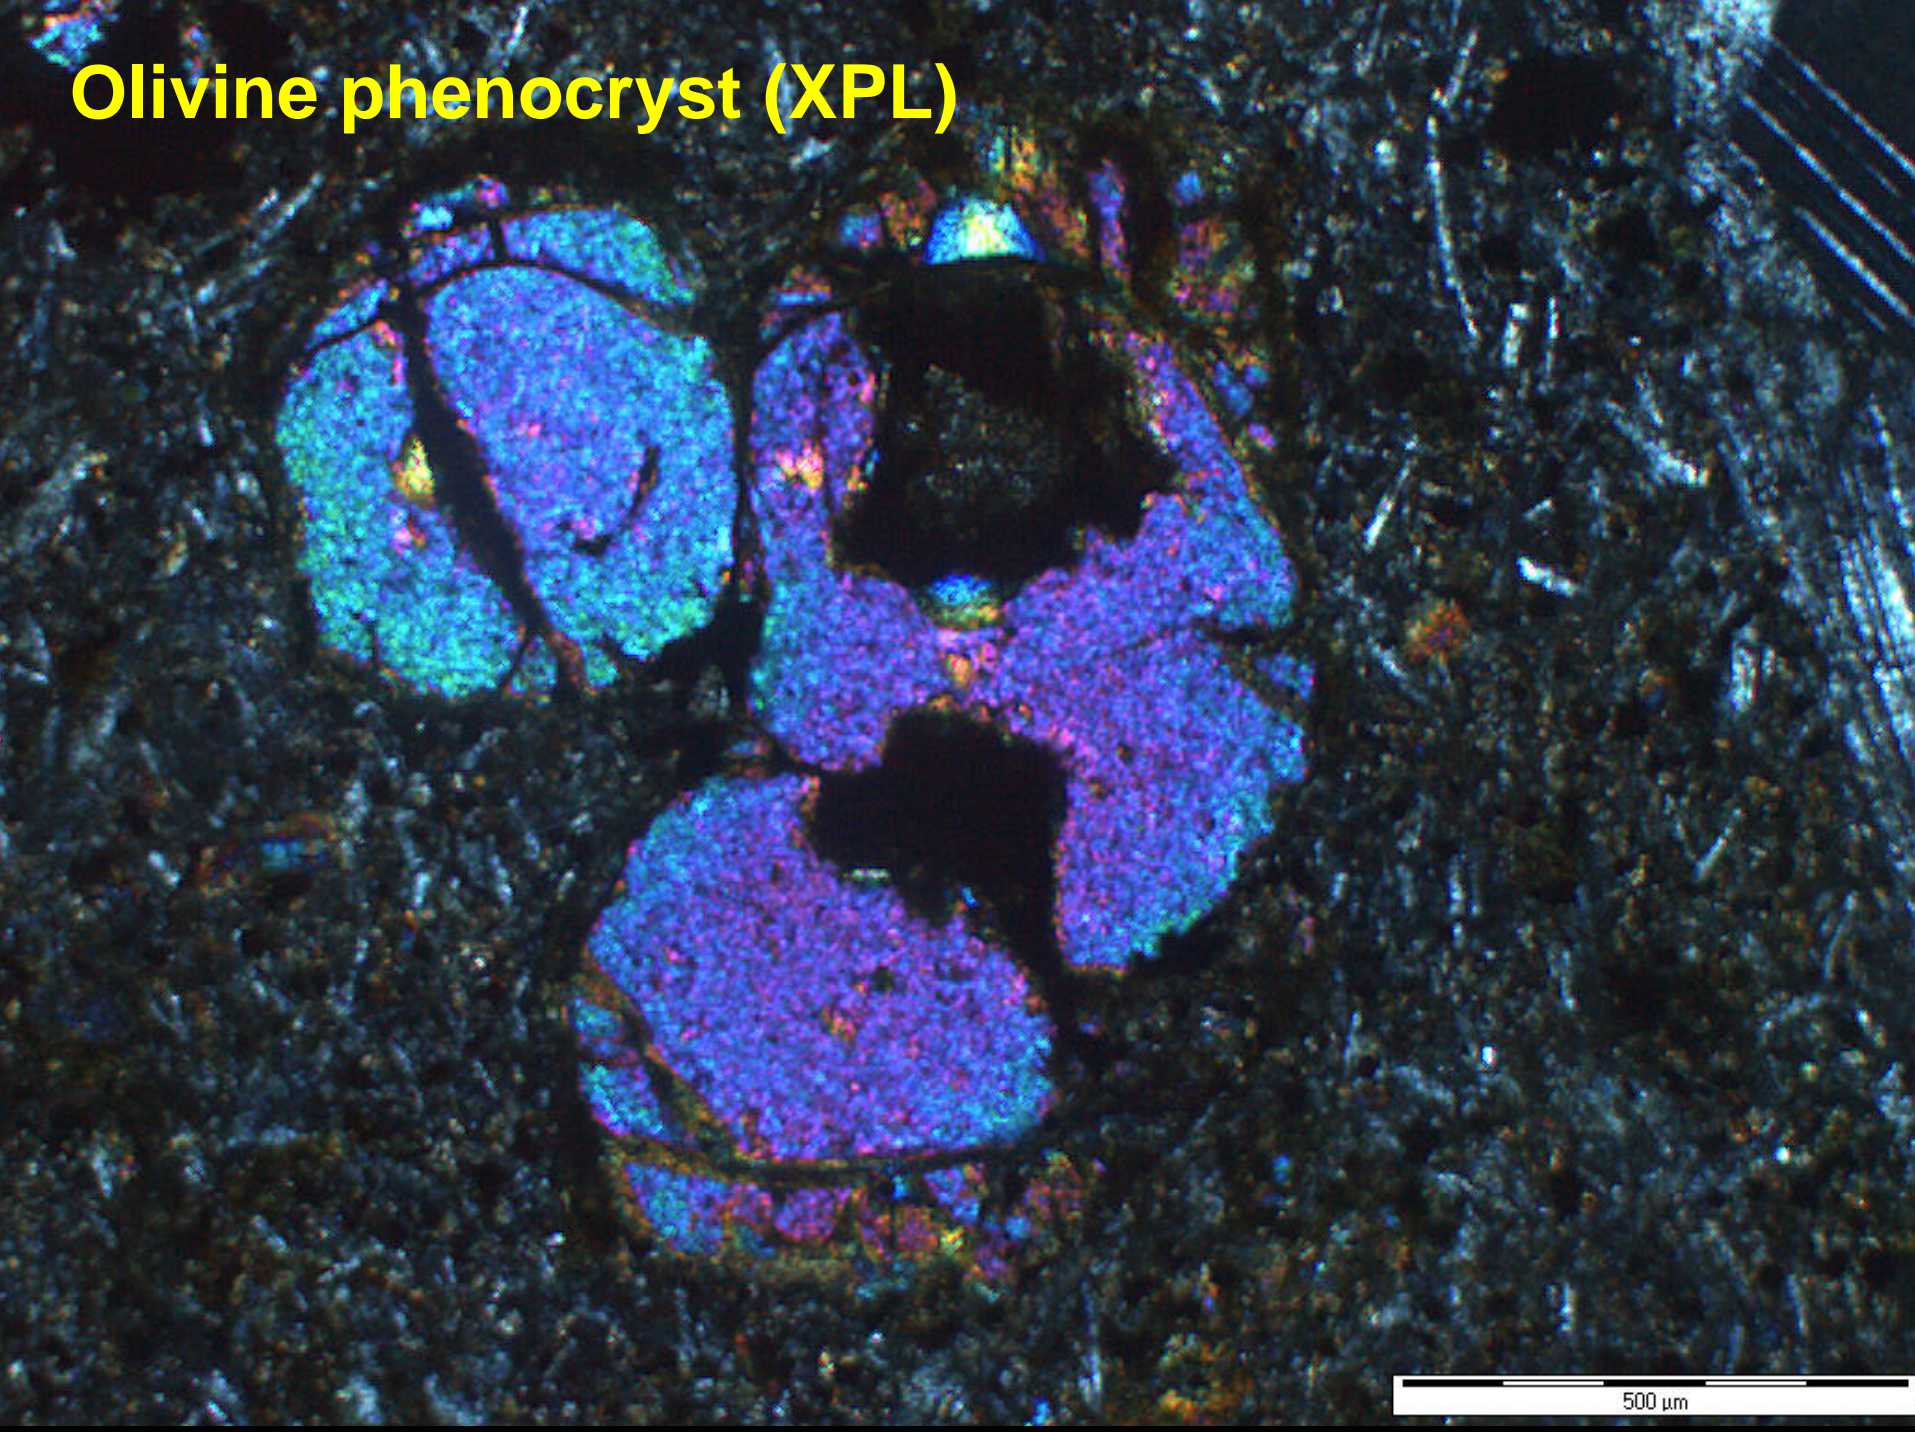

2000 μm

Olivine phenocryst (PPL)

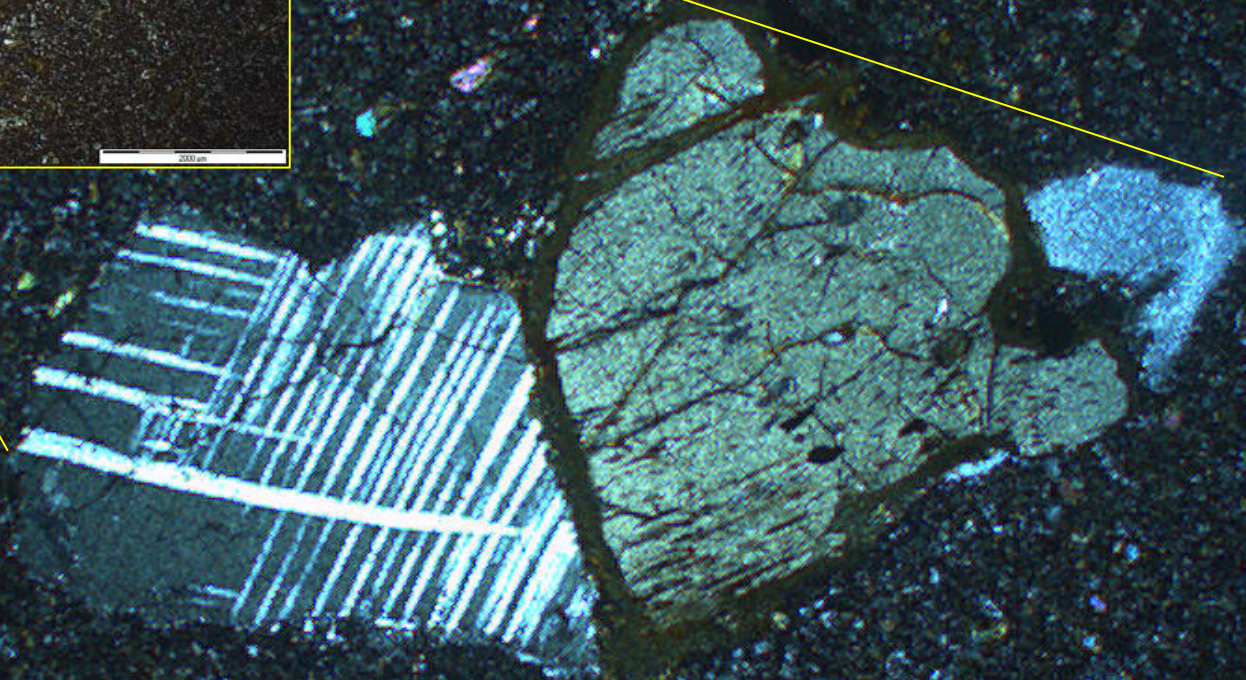

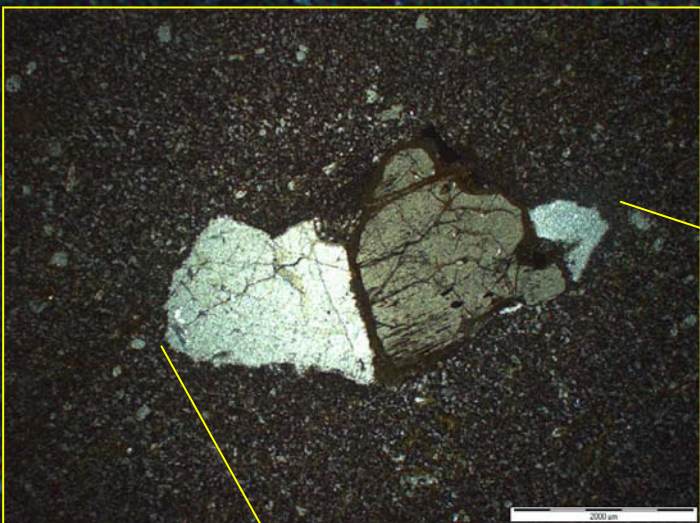

500 μm

Olivine phenocryst (XPL)

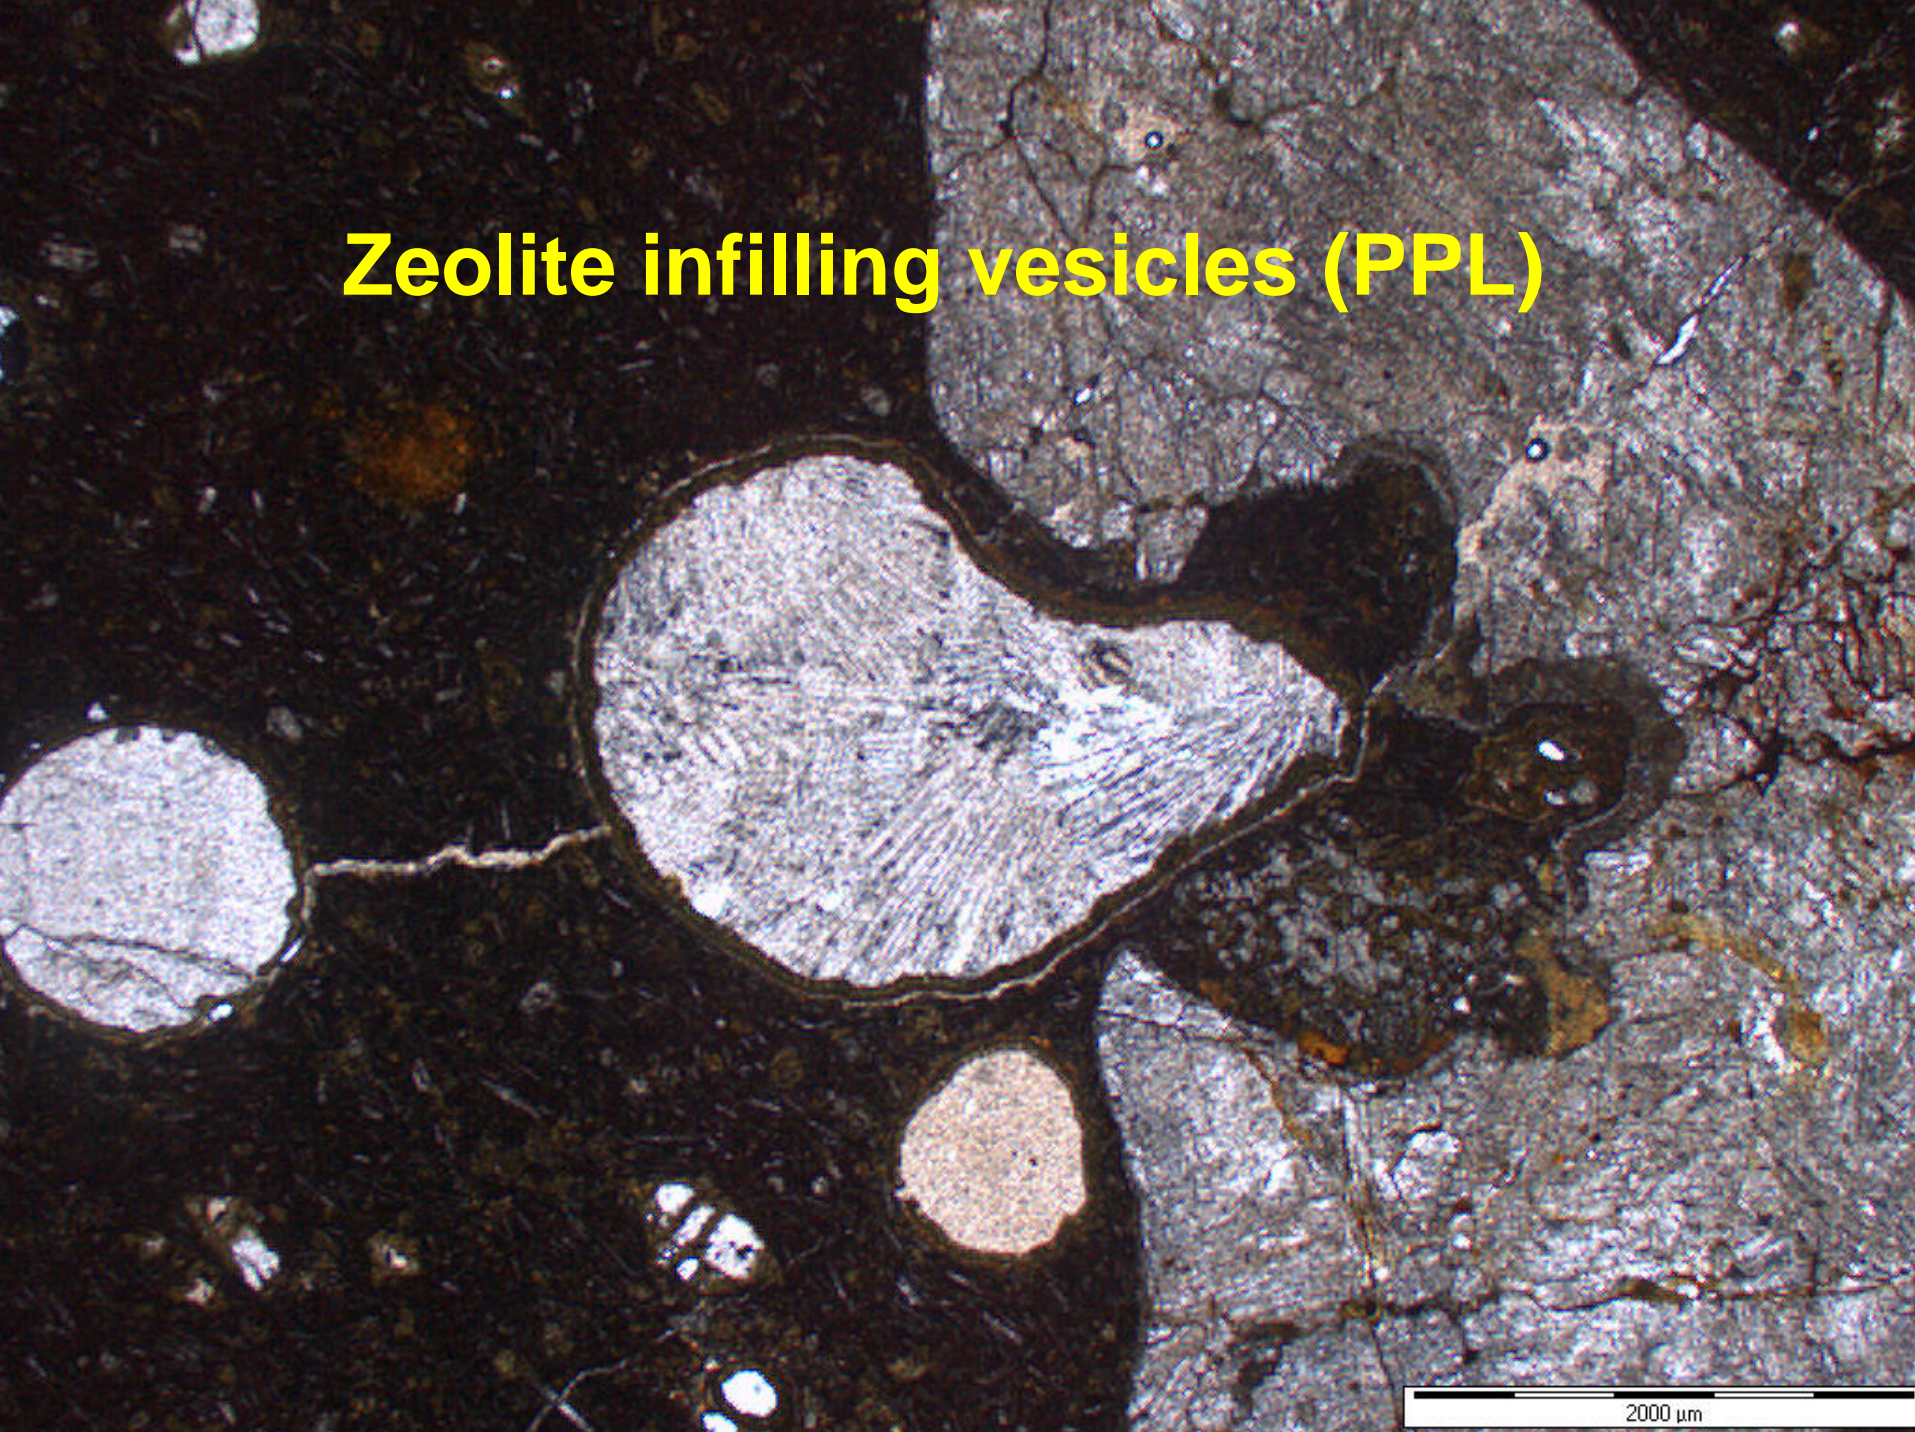

500 μm

Chromite megacryst (MLC2, PPL)

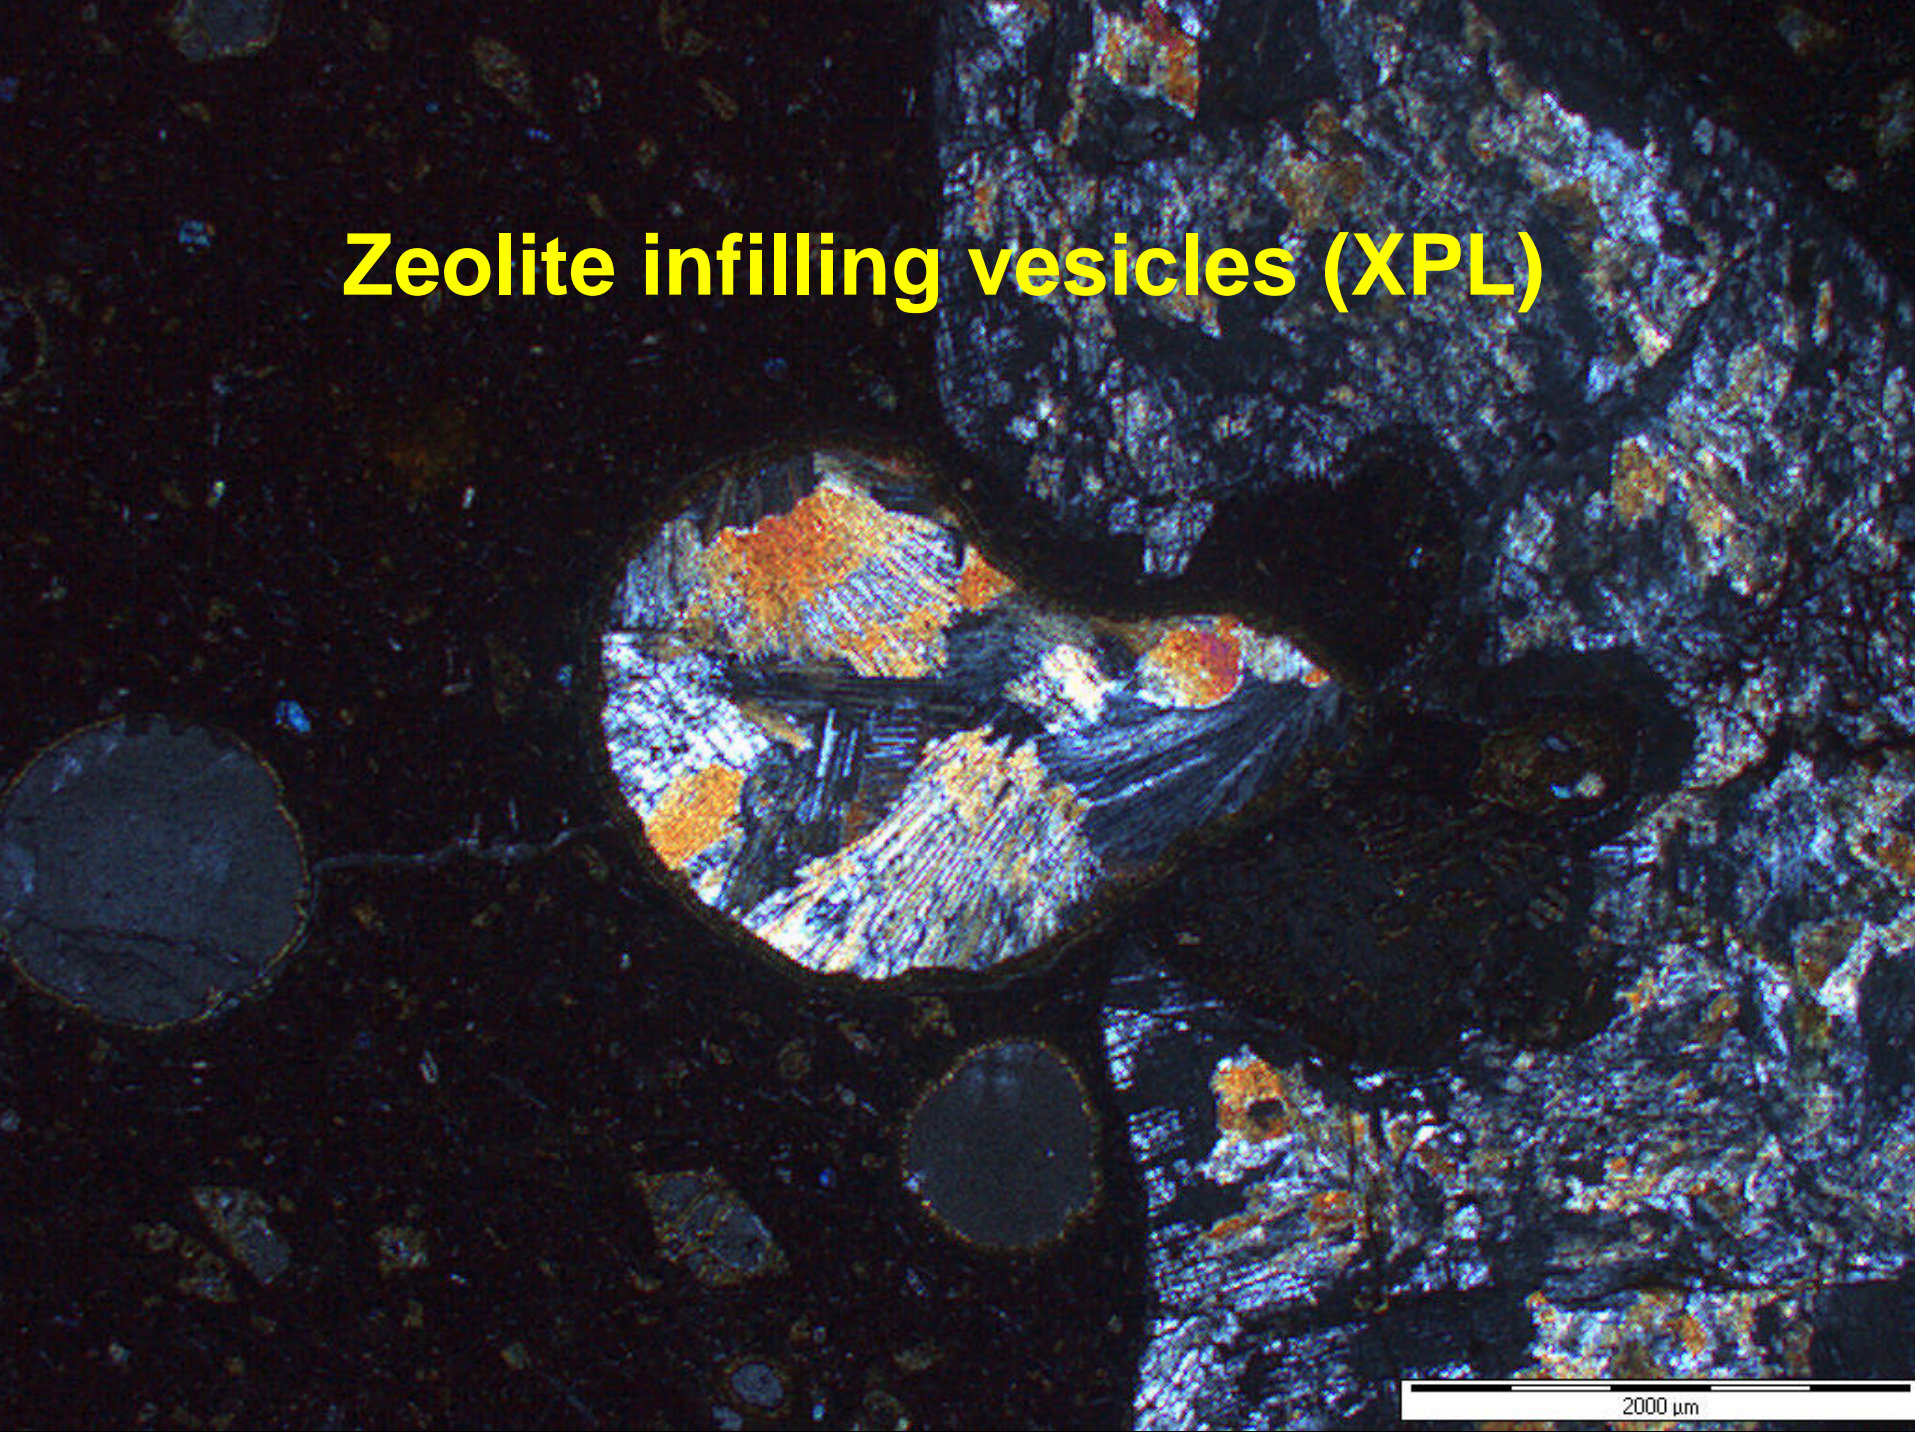

CPX + FELDSPAR xenolith

Zeolite infilling vesicles (PPL)

2000 μm

Zeolite infilling vesicles (XPL)

2000 μm
