Hi Paul

I passed your query on to John Pemberton who manages exploration approvals. John is in the field at the moment.

I assume the map is part of an application to drill Bellevue 1? You will need to submit a formal application if you wish to obtain approval to drill this well. We have provided you previously with a list of the required documents.

Regards

Carol

Dear Carol,

I refer to my email of 13 April 2011 regarding the Eagle Nest site maps.

Do you require anything further information regarding the Eagle Nest site map component for the purposes of the Bellevue #1 Permit submission?

Kind Regards,

Paul Heath
 Chief Operations Officer
 and Executive Geologist

Subject: Great South Land Minerals Ltd - Bellevue - Update of Eagle maps

Dear Carol,

Great South Land Minerals has recently completed the necessary documents regarding the updating of Eagle Nest Sites around the Bellevue #1 drill site, North West, Lake Echo. I have attached the updated nest site maps as at March 2011, nearby to the Bellevue #1 site that has been produced by The Tasmanian Land Conservancy.

Do you require anything further information regarding the Eagle Nest site map component for the purposes of the Bellevue #1 Permit?

Kind Regards,

Paul Heath
