

0-3.6 glacials

3.6-168.7 dacitic volcanoclastic breccias,
lava & sandstones feldspar phyric

} geophysical target zone: multiple small
faults, bleaching + fuchsite-sericite-
haematite altered zones
minor pyrite. No significant mineralisation

168.7-170.2 Henty fault analogue intense sericitisation

170.2-229.8 dominantly quartz phyric rhyolitic
pebble & cobble breccias, sandstone
& rhyolitic lava

← discrete rhyolite body

229.8 EOH.
