

Tasmanian Drilling Services is a family owned drilling company servicing a variety of clients in the geotechnical, environmental, water well, exploration and other drilling services using land based surface equipment. Tasmanian Drilling Services undertakes drilling work in Tasmania.

Tasmanian Drilling Services objective is to minimise risks to the health and safety of our team members, visitors, contractors and anyone else whose well-being may be affected by the way we work. We aim to ensure that all of our work is conducted safely.

Tasmanian Drilling Services will implement safe work procedures and measurable objectives and targets to ensure continual improvement aimed at the elimination of work-related injury and illness and prevention of pollution.

Objectives and targets are established based on the high risks / impacts of the organisation to minimise our risk profile which aligns to the overall HSE objective.

We will demonstrate our environmental responsibilities by preventing pollution to soil, air and water, by preventing damage to flora and fauna, by conserving energy and minimising waste.

Compliance with all health, safety and environmental legislation is mandatory at all times. Where provided, we will consider client requirements placed upon us with equal consideration to legal requirements, as a way of keeping our people safe and the environment unharmed.
