

drill_ASY	Assay data set. Typically contains follow up data from areas of anomalous core grinding results. Usually cut in 1m intervals.
drill_CAS	Casing data set. Contains details of any casing left in drill holes.
drill_DRL	Drilling data set. Contains details of hole size, type, contractor and rig.
drill_GCH	Geochemical data set. Contains all interval geochemical data, usually from core grinds.
drill_GEO	Geology data set. Contains rock type plus fragment and matrix info.
drill_HDR	Header data set. Usual header info. E, N, RL, start date etc, etc.
drill_SUS	MagSus data set. Contains magnetic susceptibility readings at 1m intervals down the hole. SI units $\times 10^{-5}$
drill_SVY	Survey data set. Usual survey info. depth, dip, azi.
