ANNUAL REPORT 1997-1998 EL11/92-MEUNNA 5S.km.

MINERAL HOLDINGS AUSTRALIA PTY LTD

**MICROFILMED**  
FICHE No.014599-

There has been no exploration on this tenement during the current year and no programme is intended during the coming year.

Mineral Holdings' reason for wishing to retain the licence is that a joint venture partnership with an overseas company is soon to be finalised utilising Dip Range sand and the Meunna deposit, is required as a "back up" resource.

MHA wishes to hold EL 11/92 until the Agreement is signed and the JV partner has decided whether or not to include it in their programme of work with a view to blending with Dip Range sand or augmenting supplies from that source.

An application to the Department was made by MHA on 14 April 1998 for a year's grace to allow time for these negotiations to be concluded.
